TOUR HIGHLIGHTS

A. Lobby - The map on the wall shows the locations of the boat builders in the Finger Lakes.

B. Video Theater - We suggest you begin your tour by watching this 13 minute video for an overview of the Museum.

C. Steamboat Room - Mr. Steve Harvey makes our miniature, to-scale steamboats. When finished we will have 4 boats from each of the four largest lakes.

D. Fishing Boats and Rowboats - We have over 80 trout boats in our collection but only have room to exhibit these 6 including the oldest boat in our collection, the Sutherland double ender built by Henry Sutherland in 1905. Also on exhibit is a boat designed by Henry Sutherland and built by his great grandson in the 1990's.

E. The Second Floor Exhibit Hall - The boats in this exhibit hall are inboards including the Elizabeth Ellen, a lavishly furnished luxury boat built in 1910 by the Faye and Bowen Engine Company in Geneva.

G. The Boat Shop - This is one of two boat shops. The other is located in the building across the street.

H. The Canoe Room - This space was used by the winery for tastings, and has three large murals. Canoes and hydroplanes are on exhibit.

I. The Ed Wightman Exhibit Hall

   Boat Molds - this space features 3 different boat molds and an example of a boat that would have been made on each.

   The Lake - This exhibit space celebrates much of what we remember of the lakes—sailing, outboard motoring, water skiing, and the lake cottages.

J, K, L. The Barrel Room, The Taylor Room, and The Admirals’ Room - The stairwell is located next to the stairs leading to the canoe room. These rooms are used for social events and are available to rent.
